

RackMountPro

1st Place Intel Server innovation Award 2008, Intel Server & Storage innovation Award 2008

Based in southern California, Yang Ming International Corporation (RackMountPro.com) was founded in 1994 with a passion for pursuing high tech computing solutions. Started in a small office and warehouse on Lemon Creek Dr., RackMountPro sold wholesale computer component products with a focus on competitive pricing and quality service. In 2001, RackMountPro began a full scale assembly line for the production of rackmount servers and storage. At the time, RackMountPro was one of the pioneer companies to specialize in rackmount servers, chassis, and accessories. Our customers cover a broad range of government agencies, educational institutions, major corporations, and small businesses.

Today, RackMountPro continues to strive to help customers quickly implement solutions to IT challenges. With a state-of-the-art R&D and manufacturing facility in the city of La Puente, the company has grown organically, providing cutting edge technological products backed up with tech-savvy engineers, four full-scale assembly lines, and a sophisticated testing lab. RackMountPro has a complete range of Intel and AMD rackmount servers with form factors from 1U through 9U and offers various innovative computing solutions for HPC, Data Center, Virtualization, Clustering, GPU, and Cloud Computing applications to help customers meet today demands of high computing capacity and competitiveness.
