

**iStor Networks, Inc.™ and Rackmountpro™, a Yang-Ming International Corporation™
Announce Partnership at NAB 2006 in Las Vegas**

Irvine, CA – April 21, 2006 iStor Networks, Inc., the world technology leader of next generation iSCSI integrated storage controllers that provide flexible, affordable and high performance solutions today announced their partnership with Rackmountpro, a Yang-Ming International Corporation (YMI) at NAB 2006, April 22nd to the 27th in Las Vegas, NV.

"We recognize the importance of key partnerships with companies such as Rackmountpro in applying the newest iSCSI technologies to deliver reliable solutions to customers and integrators that are part of a very strong organization as the National Association of Broadcasters (NAB)", says Peter Cmaylo, Vice President, Business Development, iStor Networks, Inc.

Together, iStor and Rackmountpro are building a product portfolio that will support high performance streaming video applications utilizing the cost efficient iSCSI sub-system solutions. The Rackmountpro product solution will feature the GigaStorATX™, a highly integrated storage controller solution designed to conform to the ATX form factor specifications.

The GigaStorATX product family allows OEMs, VARs, and System Integrators to use off-the-shelf White Box Server and Storage ATX enclosures to build high performance, feature rich, and power efficient, cost effective iSCSI RAID storage solutions. GigaStorATX enables the opportunity of creating block based, cost effective RAID storage solutions by utilizing the latest storage industry technologies.

The key technology difference, at the heart of the GigaStorATX is iStor's highly integrated and powerful iSCSI/TCP/IP offload SOC (System on a Chip), with the capability of sustaining 10 GbE wire speed iSCSI traffic. The GigaStorATX offers a fully featured, integrated storage-virtualization firmware stack.

"By partnering with a proven company such as the iStor Networks, we can create a block based, cost effective RAID storage solution for our customers" says William Lin, Product Manager of Rackmountpro.

Rackmountpro will demonstrate the GigaStor ATX in Booth #SL3047.

###

iStor Networks, Inc., is an innovative technology leader of next generation iSCSI integrated storage controllers providing flexible, affordable and high performance solutions to OEM's, VAR's and System Integrators. Founded in 2002 and headquartered in Irvine, California has established a global presence with offices in the United States, UK and operational facilities in Asia.
