### Recognizing innovation excellence on Intel® architecture

This year Intel held the second annual Intel Server & Storage Innovation Awards. The awards were created to recognize unique innovation for Intel® architecture-based server and storage platforms. To select the winners, Intel looked at companies that demonstrate advancements in performance, performance per Watt, unique solutions and measurable business results for challenges faced by end user customers.

#### The winners include:

- **HCL Infosystems\*** - HCL's latest innovation, the 'Core-Banking in a Box' is a solution platform comprising of three components: HCL's Datacenter in a Box, HCL's Core Banking Solution, and HCL's Extended Support & Service Infrastructure. It addresses the SI requirements of the Indian co-operative banking industry.
- **Wipro Infotech\*** - The Wipro Storage Server Z2216 addresses the demand for a secure, reliable and flexible computing and data storage platform. The Wipro Storage Server Z2216 is integrated with industry standard storage management software to deliver a flexible all-in-one DAS/NAS/SAN solution.
- **Yang Ming International Corp.\*** - The B410PT is an innovative parallel supercomputer that offers unprecedented flexibility, reliability, performance, high availability and the highest processing density. It ensures continuous uptime in a production environment, offers fault tolerance and easy of management.

#### The finalists include:

- **ASUSTeK Computer Inc.\*** - The Z7S WS motherboard is the ideal foundation for a powerful workstation. It delivers awesome power, dependable performance and unparalleled I/O scalability for the most demanding tasks and future upgrades.
- **Sun Microsystems\*** - The Sun Fire X4450 demonstrates Sun's leadership in system design. It is a 4-socket 2U server that delivers world-class performance in a compact footprint with superior energy efficiency while reducing operating costs. The Sun Fire X4450 meets all your business needs.
- **Yang Ming International Corp.\*** - The Green design ESR-316 is the latest innovative storage system from YMI that offers unprecedented flexibility, reliability, performance, high availability and highest storage density.

Intel Server & Storage Innovation Award winners were honored for their company's achievement at the Fall 2008 Intel Developer Forum in San Francisco.
