### FibreStream Test Results

MAC Pro has a multipathing function to enable all **four RAIDs** to be presented to all four ports. The four RAIDs are configured into **one striped volume**.

## IT challenges come in all sizes. We have the **BEST SOLUTIONS** to fit your needs

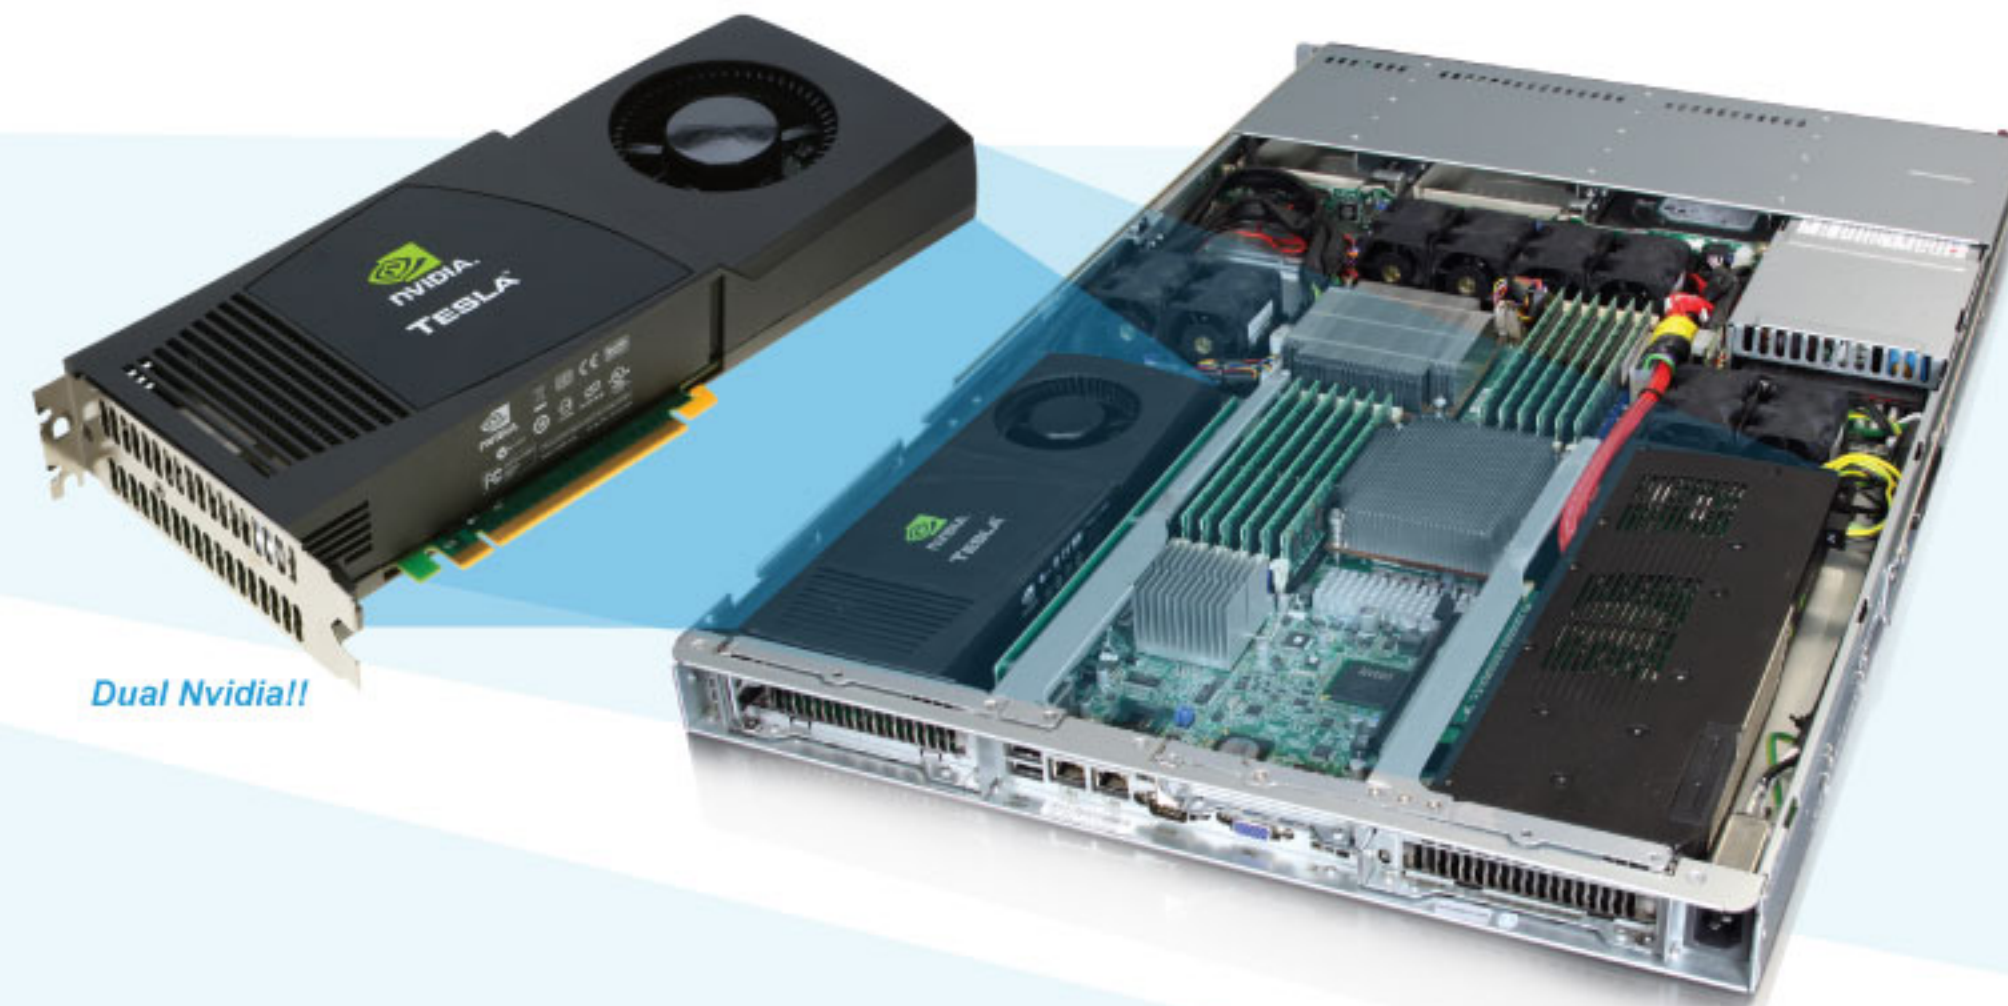

Education    NASA Space    Movie Industry    Airline Industry    Telecommunication    Corporation

YMI offers various multi-core & **High Performance Computing** systems and blades

**RackMountPro HPC server** is designed for high-end applications in various enterprise data centers or cloud computing environments that require high performance computing. By integrating the very latest advances in industry standard multi-core processor technology and cluster software,

**RackMountPro HPC server** can efficiently scale to thousands of processing cores and includes management consoles to help you to meet today's demands of **high computing capacity** and **competitiveness**.

### The RM series of storage systems

provide a common foundation for RACKMOUNTPRO's SAN, NAS (iSCSI, SAMBA, FTP, Webdir & Ldap) & Virtual Infrastructure Systems Solutions.

### FILE STORAGE

### Web Server Benchmark Pattern

Average I/O operations per second

**U320** 16 Drives  
Expandable to 18 Drives

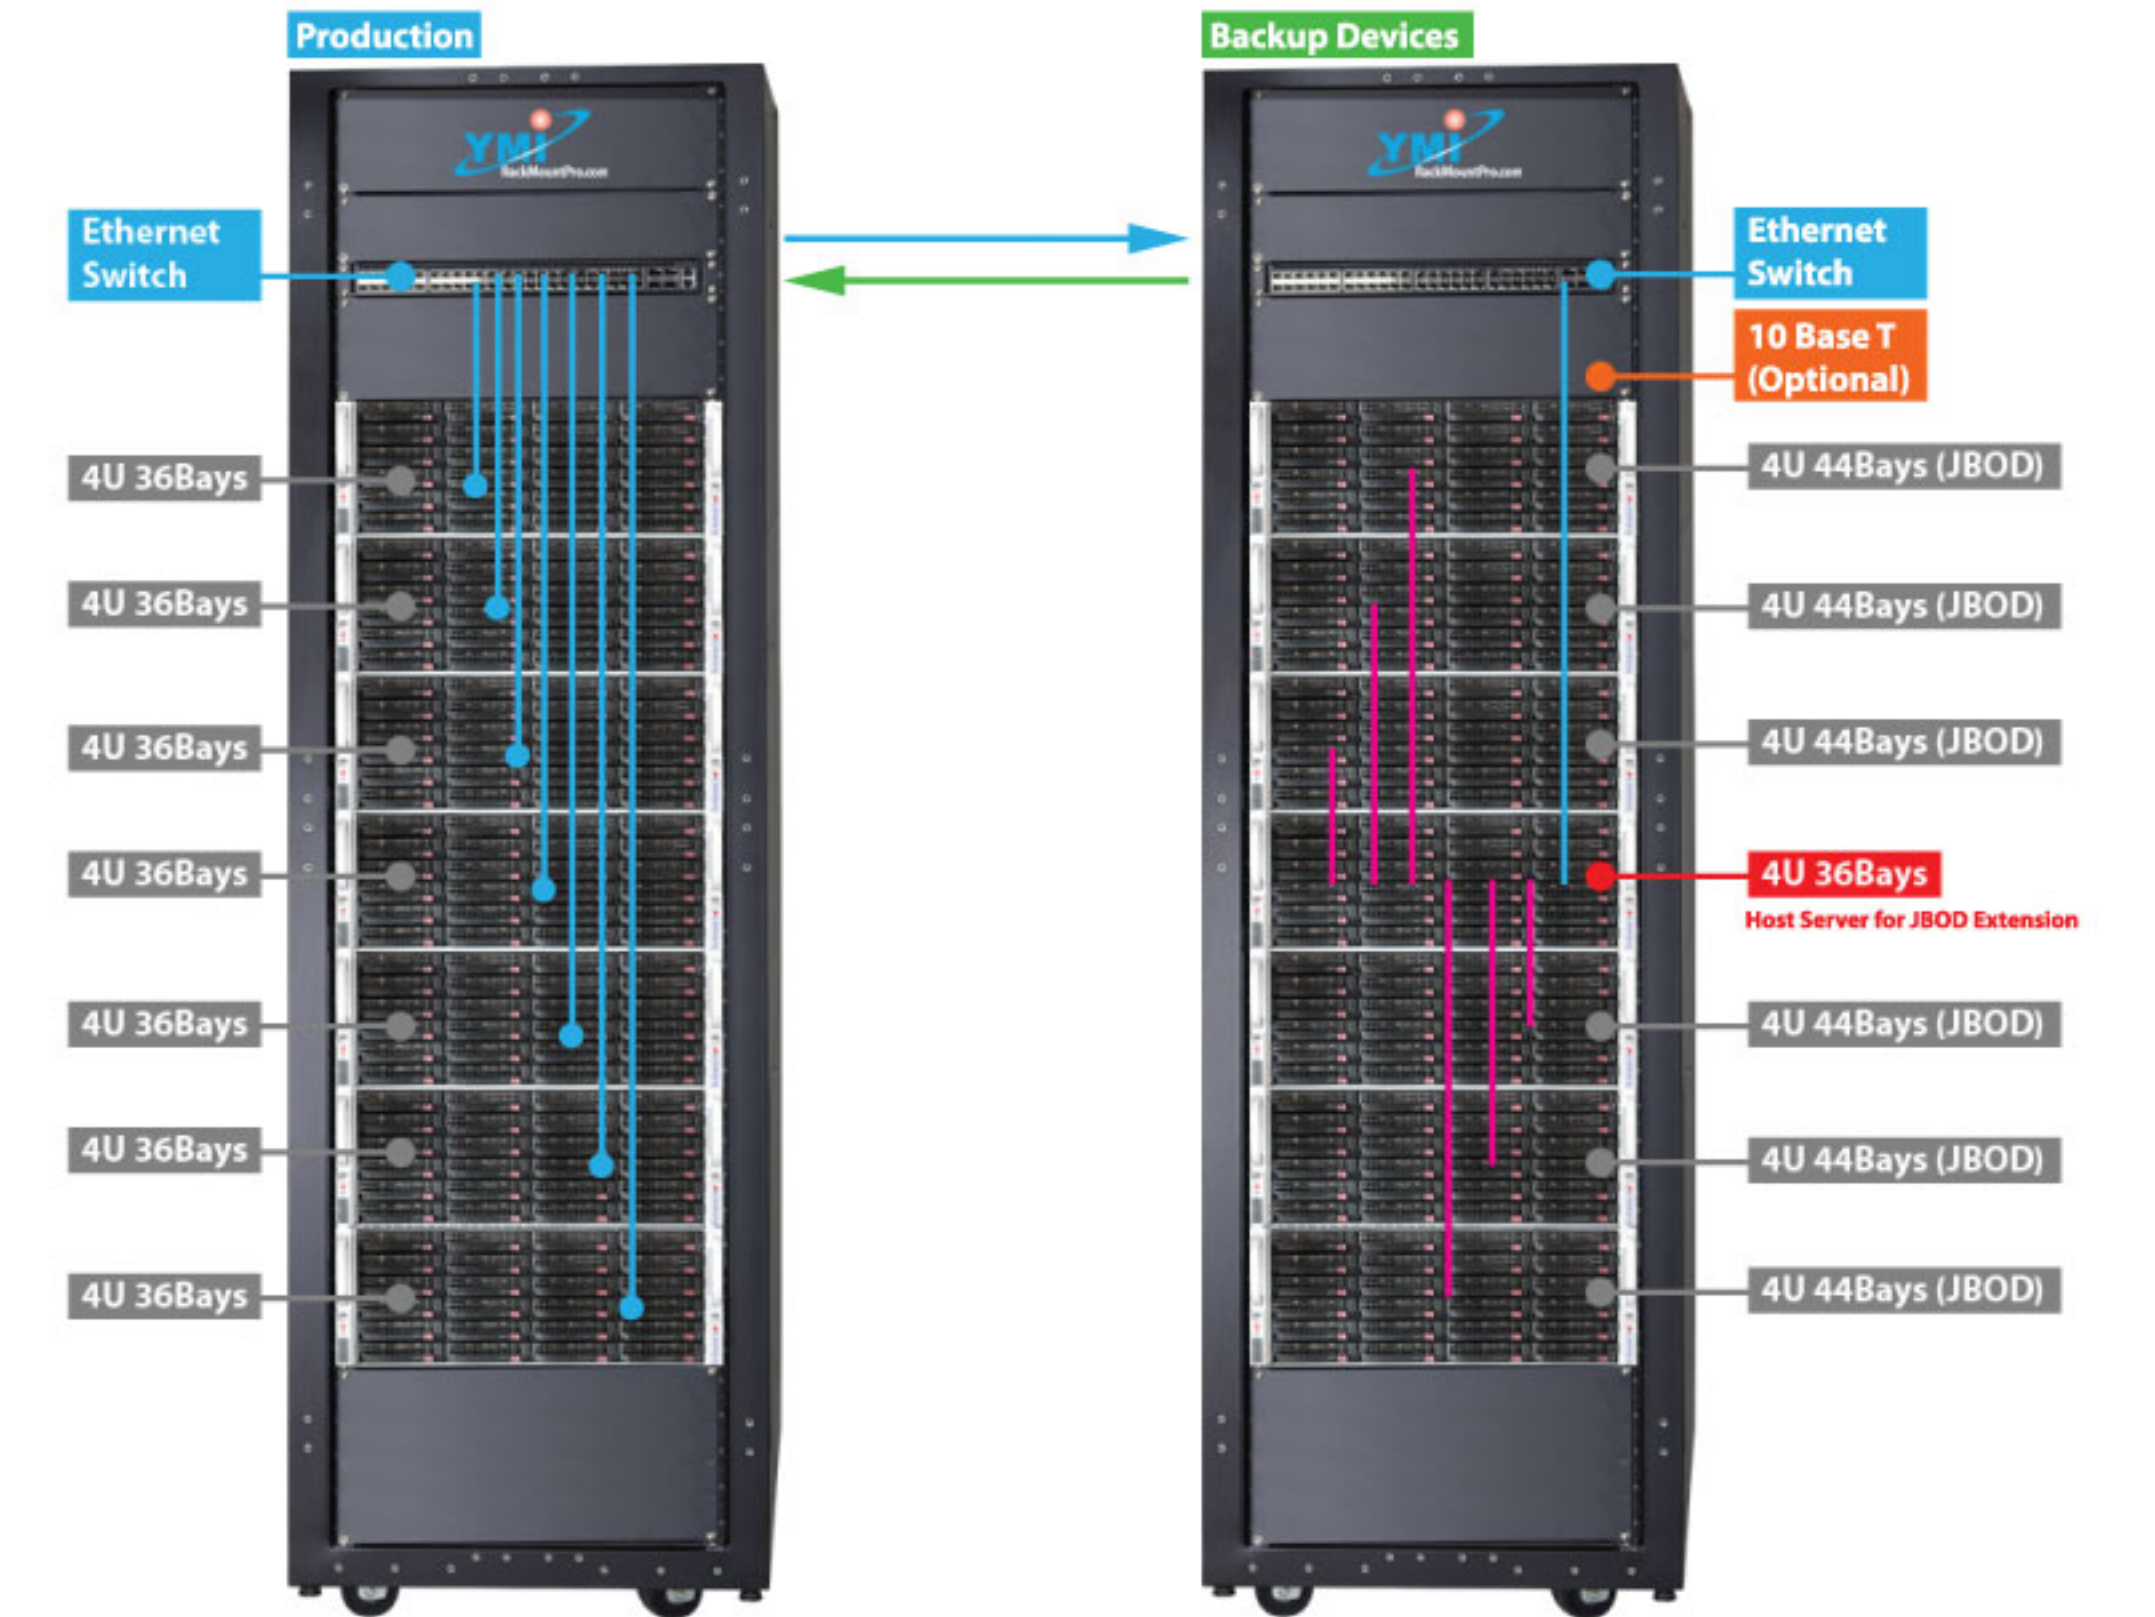

**SAS 3Gb/s** 120 Drives  
Expandable to 128 Drives

**SAS Gb/s** 240 Drives  
Expandable to 256 Drives

### Backup System

Blue = Ethernet cable  
Magenta = SAS cable
